Main Ideas/Questions	Notes/Examples	
Standard Form	<p style="text-align: center;">Linear equations are also frequently written in standard form:</p> $Ax + By = C$ <p style="text-align: center;">We will convert these equations to slope-intercept form in order to graph. To do this, you must solve the equation for y.</p>	
Steps to Convert		
Examples	Directions: Rewrite each equation in slope-intercept form.	
	1. $x + y = -2$	2. $-4x + y = 5$
	3. $5x + 6y = 12$	4. $-2x + 6y = -24$
5. $3x - 5y = 5$	6. $x - 2y = 16$	
Graphing Practice	Directions: Rewrite each equation in slope-intercept form, then graph.	
	8. $3x + y = 5$	<p>Graph</p> 

9. $-2x + y = -1$

10. $5x + 2y = 6$

11. $x + 2y = -6$

12. $x - y = 5$

13. $-8x - 12y = 0$

14. $x - 4y = -4$
