

Conversions Notes:

If move to the left, then divide.

If move to the right, then multiply.

Make the following conversions:

1. 5 miles = 8800 yds
 $5 \cdot 1760 = 8800$

2. 2 yds = _____ ft

3. 38.2 ft = _____ inches

4. .03 miles = 158.4 ft
 $.03 \times 1760 \times 3$

5. 6035 inches = 502.92 ft
 $6035 \div 12$

6. 75 yds = 0.043 miles
 $75 \div 1760$

7. 6.5 miles = _____ inches

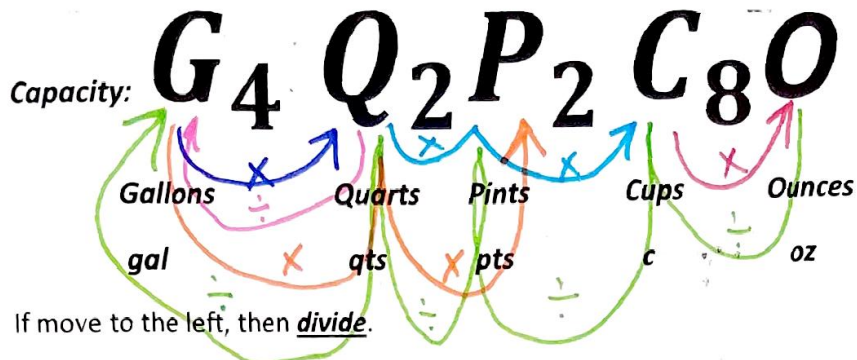

8. 20 yds = _____ inches

9. 480 inches = 13.33 yds
 $480 \div 12 \div 3$

10. 18.5 ft = _____ yds

11. 1967 ft = _____ miles

12. 180 yds = _____ miles

If move to the left, then divide.

If move to the right, then multiply.

Make the following conversions:

1. 5 gal = 20 qts
 $5 \times 4 = 20$

2. 2 qts = $\frac{1}{2}$ gal
 $2 \div 4 = \frac{1}{2}$

3. 38.2 gal = 305.6 pts
 $38.2 \times 4 \times 2$

4. .75 gal = _____ cups

5. 6.4 gal = _____ oz

6. 75 oz = _____ cups

7. 6.5 qts = _____ pts

8. 20 qts = 80 cups
 $20 \times 2 \times 2$

9. 480 qts = _____ oz

10. 18.5 oz = _____ pts

11. 1967 oz = _____ qts

12. 180 oz = 1.41 gal
 $180 \div 8 \div 2 \div 2 \div 4$

13. 34 pts = _____ qts

14. 12 pts = _____ gal

15. 7 cups = 56 oz
 7×8
